Other products available:

Free-choice minerals
 Premixes (pellets & loose)

AGRiliq Sheep Supplement is a cost-effective high protein, high-energy product in which the protein is supplied as complex non-protein nitrogen molecules that meet the exact needs of the rumen microbial population.

The unique chemistry of the AGRiliq products allows rumen microbes to maximize utilization of dry fibre.

AGRiliq Sheep Supplement contains a sheep vitamin and mineral premix, as well as Lasalocid sodium (Bovatec®) as a coccidiostat and for improved feed conversion rates.

AGRiliq Sheep Supplement is ideal for use in Lamb Feedlots, or used with a fibre source for maintaining dry stock.

AGRiliq products are free flowing and can be pumped easily at all temperatures.

AGRiliq is developed and manufactured by an Australian company, AGR Science & Technology, in Queensland.

Frankling Custom Feeds is the distributor of the AGRiliq range of liquid supplements in Northern Victoria.

Frankling Custom Feeds understand every customer has unique requirements and goals. We are specialists in custom feeding programs and happy to customize our feeds to meet your individual needs.

Quality Assurance

With over 30 years experience in the grain industry, Frankling Custom Feeds has an established history of providing quality products with superior service.
