\*DM Basis

\*\*As demonstrated in University Trials

**AGRiliq Frankling Extra** is a cost-effective high protein, high energy formulation designed specifically for Frankling Custom Feeds, to meet the unique needs of farmers in Northern Victoria and Southern NSW.

**AGRiliq Frankling Extra** can be used in conjunction with cereal hay or straw in place of lucerne and vetch hay, or in place of place of protein meals and legumes in grain mixes. It is ideally suited for use in mixer wagons.

**AGRiliq Frankling Extra** is a combined protein and energy supplement, based on non-protein nitrogen, where half the protein comes from complex NPN molecules and half from urea. It is designed release energy and protein in the rumen at the same rate it can be utilized, helping to maintain a stable rumen environment, leading to improved feed efficiency with minimal losses.

The unique chemistry of the AGRiliq products allows rumen microbes to maximize utilization of dry fibre.

**AGRiliq Frankling Extra** does not contain any added vitamins or minerals, making it ideal for inclusion in cattle and sheep feedlot and dairy rations.

AGRiliq products are free flowing and can be pumped easily at all temperatures.

AGRiliq is developed and manufactured by an Australian company, AGR Science & Technology, in Queensland.

**Frankling Custom Feeds is the distributor of the AGRiliq range of liquid supplements in Northern Victoria.**

**Frankling Custom Feeds understand every customer has unique requirements and goals. We are specialists in custom feeding programs and happy to customize our feeds to meet your individual needs.**
